

ALCAR TPMS Service Kits

ALCAR recommends exchanging of all relevant components of TPMS valves when changing tires, to ensure the functionality of the TPMS system and the safety of all passengers.

While snap-in (rubber-) valves completely have to be replaced, should clamp-in (metal-) valves be checked and at least rubber grommet, nut, valve core and valve cap be replaced.

Use the following application list to find appropriate service kits of all OE sensors of all major manufacturers and also for different kind of aftermarket sensors.

To prevent damage when replacing, note also the required tightening torques of the individual components. Use only specialty tools and replacement parts to ensure proper fit and function.

Valves & Service Kits

Tightening Torques

Valves (PU: 10 pcs/article)	relates to OE Producer	relates to TPMS sensor of brands:	Article Description	Nm Nut Torque	Nm Screw Torque	Nm Valve Core

To prevent damage when replacing, note also the required tightening torques of the individual components as you can see on page 1.

Use only specialty tools and replacement parts to ensure proper fit and function.

This TPMS Tool Kit contains all of the workshop tools required for servicing or replacing TPMS sensors. Article: **SKA001**

* service kits and valves refer to OE sensor
Packing unit: 10 per article
